

## Instructions to make folded square seed pots from recycled newspaper.

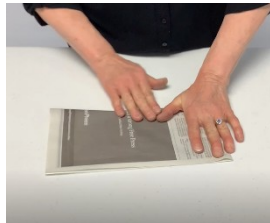

Watch the video tutorial on our YouTube channel at:

<https://www.youtube.com/c/SouthCentralRegionalLibrary>

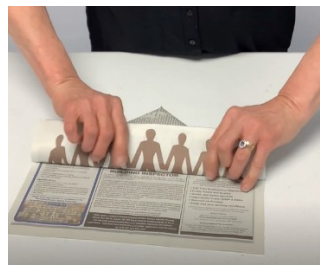

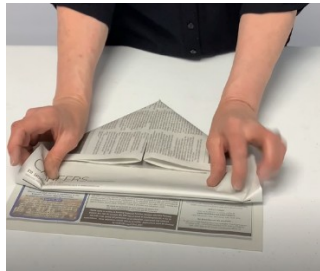

### Materials needed:

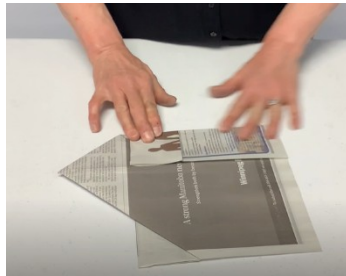

Single sheets of newspaper or flyers (don't use glossy printed paper).

Fold the sheet of newspaper in half width-ways. Fold in half again long-ways. Crease each fold well. Bring folded edges to middle fold to form a triangle.

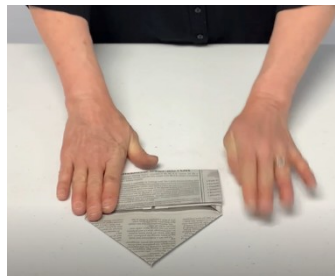

Fold one thickness of paper to the bottom of the triangle. Fold back over the triangle.

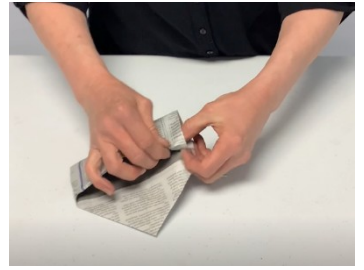

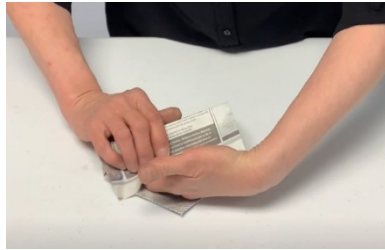

Turn paper over and bring both edges to the centre fold.

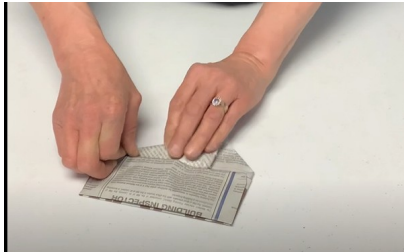

Fold bottom up and align to folds.

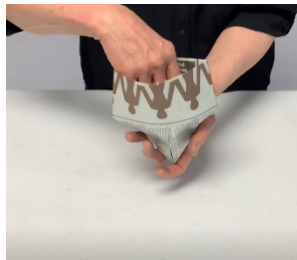

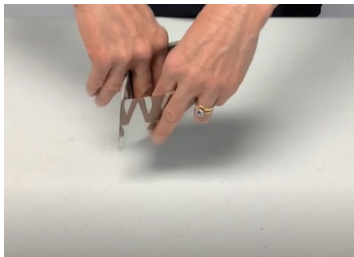

Fold from bottom up over folds.

Tuck the folded, loose bottom edged inside behind the flaps to form a pocket.

Fold one edge to the centre pocket.

Turn over, open and gently pull into a square shape.

The final fold made will automatically want to flatten out and form a square bottom. Help it lay flat.

The pot is complete.
